

# Integrating Semaglutide in Practice

## Key Takeaways

- ▶ SELECT showed optimal CV risk reduction across patient groups – even high-risk patients on treatments such as statins
- ▶ Look at the patients in your care: semaglutide is a good option for people with overweight or obesity and CV risk factors
- ▶ Semaglutide can prevent secondary occurrence of CV events
- ▶ The evidence from SELECT suggests semaglutide can prevent heart attack, stroke, and CV death in our patients

CV, cardiovascular
